

# Virtual Organization & Relationship Systems at Work

## Overview

Constant change is the new norm. Thanks to the internet which facilitates global collaboration 24/7, work that was once performed by individuals is now being tasked to teams. The increase in numbers of knowledge workers who must share information, insights, learning and best practices in order for companies to succeed, further stresses communication channels.

So how can organisations create a work environment that supports complex human interactions, embraces conflict, retains valuable knowledge workers and change at the speed of light while remaining profitable and productive?

## Relationship Systems Intelligence™

Beyond Emotional Intelligence (relationship with oneself), and Social Intelligence (relationship with other) lies Relationship Systems Intelligence, where the focus is on the collective wisdom of the group, team or system.

This approach has been effectively applied in family and marital therapy for decades, and is now being brought into the realm of work teams and organisations with positive results.

In this two-day course, you will leverage Relationship Systems Intelligence to tackle some of the common ailments that plague work environments:

- Δ Ineffective or toxic communication
- Δ Low team morale or burnout
- Δ Conflict avoidance and non-resolution
- Δ Lack of creativity and productivity
- Δ Confusion about roles on a team
- Δ Intercultural issues in a multicultural team
